

Jawknee Music - bio

With three studio albums, "My Turn" (2014), "Backgrounds" (2015) and "HEAVY HEART" (2019) and over 200 concerts in Germany and all over Europe as well as several praising press reviews, the multi-faceted Trier has attracted attention in recent years. Behind JAWKNEE MUSIC, although the songs often sound like more elaborate arrangements, is the musical multi-talent Johannes Steffen, who is also a singer with A HURRICANE'S REVENGE, and drummer with MATCHES.

His unmistakable voice can sound soft and melancholic as well as hard and rough and contributes not insignificantly to the formation of a very own sound, which has been consolidated over the years.

The presentation of the songs is also varied - both the solo and the band pieces (cello, drums, electric guitar) were mostly recorded entirely by himself.

With his third record "Heavy Heart" (released 13.12.2019, Homebound Records), the Trier native is now breaking new ground: musician friends were invited to the studio, who will now also bring the full range of his music live on stage in rock band format. In addition, the likeable Trier continues solo on the stages of this country.
